# Things to do TODAY

DATE 8 OCT 75

Dear Mr. & Mrs. Weisberg, ✓ ☐

Enclosed please find check for $32.00 for insured copies of "FRAME-UP" and "Oswald in New Orleans."

I caught the 'National Enquirer' interview. Congratulations! Your analysis in W-I of the differences between Dr. Humes hand-written draft of the autopsy report and his final typewritten version in regard to the anterior neck wound puncture will indicate forever for me that Kennedy was first hit in the neck from the front. (p. 183 at the bottom, etc.) If you could possibly let me know what you consider to be the best source that establishes that JFK was in the process of getting out of Vietnam I would be most interested. It seems that the 2 OCT 63 statement that he had McNamara & Taylor make from the White House was his strongest statement; I've wondered if his Admin.

CROWN PRINTING COMPANY, INC.

I've startled some local candidates for state political offices (all lawyers!) by asking their position on JFK's assassination. When I informed them that both as lawyers and wouldbe politicos they should know something about how corrupt many of the W.C.'s staff were, among others, they almost choked on their hot-dogs. Evidently for lawyers it's mostly politics and very little law. It's heartwarming to think that you have been able to find a few discerning and courageous lawyers to carry a bit of your burden for you.

Is it possible that Hoffa knew something about Jack Ruby and his (Ruby's) real motivations in slaying Oswald, maybe based on knowledge gained in prison or from some of his other nefarious contacts and that he was 'put away' because of it? Like Hoffa or not, he is one more (major?) national figure to go down the drain as a result of conspiracy. I'll admit there is little probability to this thought, but there were all those phone calls to 'top teamster officials' (NYT 19 AUG 75, p. 34) recorded on his phone bill.

With best wishes, I remain

Sincerely

James C. Steen, Jr
